

Urban Extension Resources

Available through Extension Foundation

National Urban Extension Leaders (NEUL) nuel.extension.org

The NUEL website with urban Extension resources is hosted by Extension Foundation.

Extension Foundation extension.org

Extension Mission: To help Cooperative Extension generate a more visible, measurable, local impact. They achieve this through their nationally funded programs made possible by member dollars and cooperative agreements with federal agencies, and through partnering on state, regional, and national initiatives with [Cooperative Extension and the Extension Committee on Organization and Policy \(ECOP\)](#). Extension Foundation serves all land-grant universities, regardless of membership status.

National Funded Programs lead by Extension Foundation

[New Technologies for Ag Extension](#), [Pesticide Safety Education Funds Management Program](#), [Impact Collaborate](#), [1890 Extension Leadership Academy](#), [EXCITE](#). Extension Foundation also hosts projects like [Ask Extension](#) and the [National Registry of Cooperative Extension Programs & Assets](#).

eFieldbooks <https://reader.extension.peblproject.org/?>

The eFieldbook is a *go-to* resource for Extension professionals and project/program teams to begin discussion, help establish processes, and assist with the delivery of new programs. There is an eFieldbook about Urban Extension.

LinkedIn login is required to access the eFieldbooks. This is like using Google or Facebook to log in instead of setting up a separate account. If you do not have a LinkedIn account, you can [register for a free account](#). The purpose of the LinkedIn login is to provide an encrypted ID to the eFieldbook so users can securely interact with that eFieldbook, take notes, and make contributions. The Extension Foundation is not collecting your personal information. To receive update notices from, you can opt-in the first time you enter an eFieldbook and provide your email address.

Once registered with LinkedIn, you can sign in and download books from the eFieldbook bookshelf. Once you download your first book a short tour of the PeBL eBook features will be provided. Once installed, the PeBL eReader acts as an application that uses, but does not require an internet connection.

Connect Extension connect.extension.org

Connect Extension groups are emerging, such as the Urban Agriculture Collaboration Network.

This resource is compliments of the team presenting "Urban Extension Personnel"
at the [2021 Extension Leadership Conference](#)

(modified from a [Leadership in the City](#) resource - contact: fox.264@osu.edu)
